Key Trends & Themes

1. AI Coding Tool Wars Hottest Topic

Intense debate comparing Claude Code, Codex, Cursor, Lovable, Bolt, and Antigravity. Consensus: greenfield projects thrive with AI; legacy monoliths struggle. Engineering background still matters for security, DevOps, and scale. Erik upgraded to Claude Max and calls Opus "a powerhouse." Damon built a full CRM over Christmas with Claude + Supabase.

Jan 5–6

2. AI Hype Backlash & Critical Thinking Rising Trend

Strong pushback against AI hype. Caroline calls for originality over prediction. Dan warns LLMs are "mirrors — you only see yourself." Jason critiques auto-generated PRDs and calls out cherry-picked success stories. Joana highlights that influencers promoting AI tools often have financial incentives. Sascha notes that good judgment remains a differentiating asset.

Jan 12–13

3. PRD Evolution & Documentation Philosophy Product Practice

Dan is on a mission to kill PRDs for anything not requiring an architect. Gia shares experiences with orgs spending months perfecting PRDs. Laurence highlights that team seniority and risk appetite drive documentation depth. Ruan shares Linear's PRD template and argues AI has dropped build effort so much that specs are "expensive procrastination."

Jan 12–14

4. AI for Language Learning Community Event

Multi-day thread on Duolingo's limitations sparked Jason to vibe-code LingoWeave in an afternoon. Natalia (ex-language learning industry) provides deep learning science context. Debunking of "learning styles" myth. Community organized a dedicated Zoom call on the topic.

Jan 5–13

5. Personal AI Assistants & Security Emerging

ClawdBot/MoltBot sparks excitement and concern. Mac Minis selling out as people build dedicated hardware. Simon tried it on EC2 and had a "security panic." Sascha warns the current attack surface growth is "breathtaking." Simon Willison's "lethal trifecta" article widely shared. Harry built his own personal AI chief of staff called "Antonson."

Jan 28–29

6. AI Market Dynamics & Positioning Industry

Gemini reaches 21% market share. Google's distribution is its moat. Claude has deeper enterprise/white-label penetration (Perplexity, etc.). Grok seen as niche — useful for unfiltered sentiment analysis. Meta acquires Manus for agentic infrastructure outside its ecosystem.

Dec 30 & Jan 7–8

7. Digital Twins & AI Ethics Philosophical

Delphi.ai's "immortal" product and MyPersonas.ai trigger deep debate about who owns your digital twin if your employer creates it. Caroline raises the staleness problem — twins lag behind real-time human learning. Concerns about trust erosion and removing human connection.

Jan 17–18

8. Geopolitics Meets Tech Strategy Macro

Caroline frames US tech dependency as a product strategy concern. Alastair notes the UK lacks domestic payment rails. Discussion of swapping US tools for EU/UK alternatives. Technofeudalism book recommended by multiple members. Greenland tangent as lens into power dynamics.

Jan 18

9. AI Engineering Efficiency Metrics Practical

Ryan rolling out Codex to 40+ dev team, targeting 5–10% efficiency gains initially. Max reports enterprise pilots landing at 20–30% improvement. Laurence pushes back on "10x" claims, citing research showing 20–60% gains mostly for junior devs on coding tasks. CodeRabbit vs Codex for code reviews compared.

Jan 5 & Jan 8

10. Building AI Products (0 to 1) Practical

Mikkel shares detailed framework from building an AI companion in women's hormonal health: start with human discovery, test behaviour not answers, finetune only after repeated failures. Sascha adds evaluating probabilistic systems requires investing more in qual research and backend observability.

Jan 26–27

11. AI Consulting Gold Rush Career

Jason notes a well-regarded consultant pivoted entirely to AI consultancy because it's the only thing selling. Maven AI courses critiqued. Caroline leans into soft skills as a counter-bet. Everyone acknowledges the market is getting saturated with AI offerings.

Jan 13

12. Head of AI Role & Data Strategy Org Design

Anuj and Prasana debate the Head of AI skillset. Key tension: academic/research background vs applied product delivery. Data strategy identified as critical and cross-functional (AI + Product + Engineering). Org AI maturity level determines boundaries.
